

# Homework

Monday 4th November - Monday 9th December

## Project hand in date: Monday 9th December

We expect at least three of these projects to be completed over the academic half term. You can use your project book to record your work and to practise your spellings. You can also present your work in other formats, so be creative! Can you earn your half term certificate in recognition of your project? Any projects that are completed can be brought into school on **Monday 9th December**.

This half term our Geography topic is **Up, Up and Away**; focusing on maps, symbols and compass points. Please carry out some research on this. You will present your project to your class at the end of term. Below are some ideas about how you could present your project -

- Create a map and key of the local area. Be as imaginative as you like! You can use any resources to make this.
- Write instructions/directions using compass points; you can even record your child carrying them out and email to the school's email address!
- Create a diagram of all the different types of maps you can name.
- Plan and draw a route from home to school.
- Research a local place and draw an aerial view.
- Think and create your own symbols for a map.
- Sketch a map of your ideal place. Use symbols to show what would be there. You may need to think of your own symbols!

## English

### Spellings-

Children will have a spelling test each Friday and bring home their score.

## Education City

You can use this to practise any activities you feel your child would benefit from.

## Time Tables Rock Stars

You can use Rock Stars and Numbots to practise your timetables! Can you become a Time Table Rock Star hero?

## Maths

During the Autumn 2 term, addition and subtraction within 10 and Shape. Please continue to practise these at home.

## Reading

Your child will receive a stage appropriate reading book every **Friday**. These must be returned on the following **Wednesday**.
